NEXON AGILE BUSINESS CLOUD

Nexon Agile Business Cloud (ABC) is a dynamic cloud-based ICT platform that will improve the way you manage, deploy and consume technology.

At Nexon, we have built ABC to enable you to make the smart move to cloud based systems for your ICT needs. Our expert engineering team, will enable you to move your ICT requirements forward onto the most efficient and cost effective platforms.
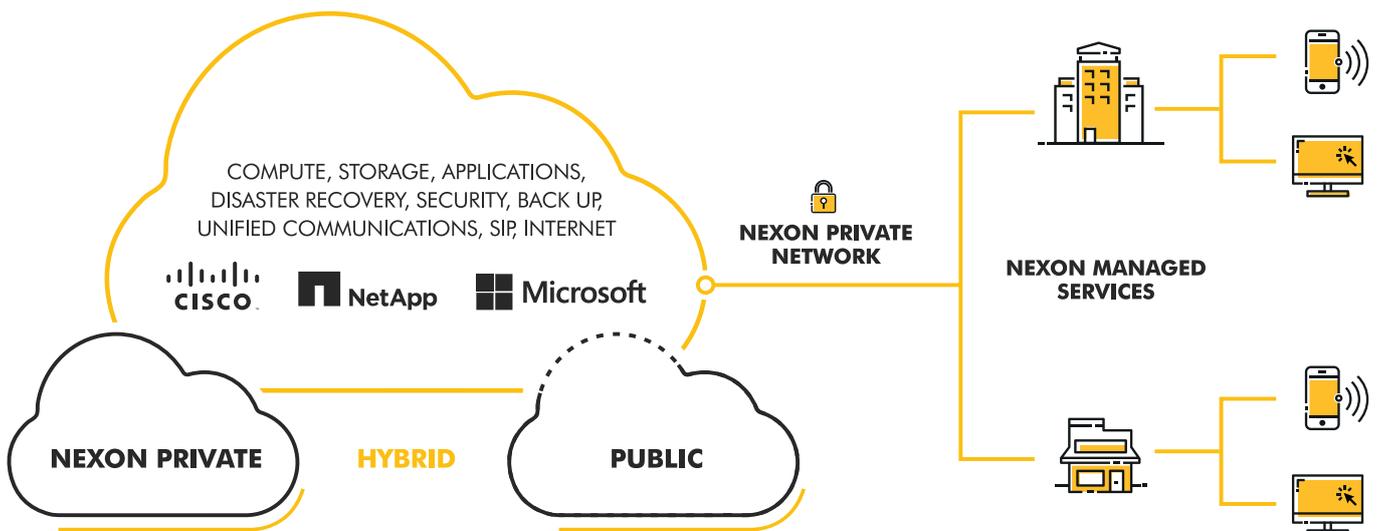

You can either retain full control of your servers, applications and licensing on our hosted platform, or we can provide them to you as a fully managed service. We have interfaces into the Public Cloud so we can plan and manage the entire end-to-end implementation, freeing up your resources to focus on higher value projects. We give you the flexibility to adapt the cloud to your business requirements and we will guide you through the entire process at a pace that works for you.

MAKE THE SMART MOVE WITH NEXON ABC

Your organisation will experience efficiency gains and cost savings as we manage hardware and software issues that would normally take up your resources. At the same time your organisation will be more agile, mobile and secure.

Nexon ABC is built in partnership with the world's leading technology vendors – Cisco, NetApp and Microsoft. Our platform is future proof because it is designed to adapt to the evolving market place and your changing business needs.

Because we constantly invest in the latest technology people and process, partnering with Nexon is a smart move. We deliver you the highest levels of service combined with the best technology available.

I.T. FOR THE DYNAMIC BUSINESS

KEY FEATURES

MANAGED PLATFORM

Nexon ABC is managed by our team of expert engineers. According to your requirements we can deliver, implement, and manage server capacity, licensing, monitoring, upgrading and identity management.

HOSTED INFRASTRUCURE

Moving to ABC means that your infrastructure services are located in first class data centres. These services are directly connected to your private network and protected by common security policies. Our high performance network delivers your applications to your business anywhere and anytime.

HOSTED SOFTWARE

Nexon ABC provides you with secure private access to a range of Nexon software services such as voice, video, unified communications, contact centre, e-mail, web and public services such as Office 365. Nexon can help with integration of public and private applications as well as security policies and monitoring of public cloud services.

AGILE PLATFORM

For a number of reasons some applications are not public cloud ready, others you may simply prefer to keep on a private platform. Nexon ABC is a Hybrid cloud architecture designed to deliver the benefits of both public and/or private clouds. In addition to this agile physical architecture, ABC's flexibility enables you to use Nexon supplied licenses or bring your own.

KEY BENEFITS

COST CONTROL

Nexon ABC allows you to control your costs by aligning your infrastructure and software platforms to a monthly service. You only pay for what you consume allowing you predictable control of your monthly expenditure.

DEPLOY FASTER SERVICES

Having access to a ready-built hosted platform allows you to upscale your computing very quickly – without the need to purchase hardware, have it delivered, installed and configured. This is the future of I.T. available to you today.

IMPROVE USER EXPERIENCE

Nexon ABC is online and available 24/7 which means your users have access to all their data and applications wherever and whenever they require them

PARTNER WITH EXPERTS

By choosing Nexon ABC, you are partnering with engineering experts, who are supported by the world's leading technology vendors.
