# Nexon Cloud optimisation assessment

Take control of your cloud environment and drive cost efficiencies.

Today there is tremendous pressure on organisations to drive efficient consumption of IT. Gartner Research indicates that organisations waste **25-30%** of their cloud spend[1] despite cloud cost management and optimisation being one of the top three priorities.

Through our experience, we have witnessed organisation taking advantage of the agility, elasticity and flexibility cloud offers while forgetting the scaffolding and best practices required for cloud architectural optimisation and cost management. This can lead to cloud sprawl and inefficient operation of cloud environments, often leading to an overrun in spend on both people and infrastructure to manage cloud deployments.

Nexon's Cloud Optimisation Assessment offers organisations the ability to review their current cloud environment and provide actionable recommendations.

Optimise your environment and:

Reduce costs and rationalise your I.T.

Increase efficiency

Reduce risk. Avoid downtime and data loss.

Improve governance. Enhance security across your environment.

Our Cloud Optimisation Assessment is a four-step process that allows your organisation to enhance your cloud environment:

Discovery

Discover infrastructure and application landscape

Workshop

Stakeholder workshop

Mutually agree approach

Analyse

Analyse current state data

Identify cost optimisation areas

Prepare current and `future state optimisation

Recommend

Present report and findings

Mutually agree on execution of recommendations

Built on the foundation of security, governance and optimisation.

The Nexon Cloud Optimisation Assessment meticulously assesses and provides detailed recommendations across security, governance, and optimisation.

✅ Secure

- Insufficient identity, access, and credential management
- Technology vulnerabilities and misconfigurations
- Information leakage due to insecure assets
- Misuse of cloud services by malicious insiders

✅ Govern

- Financial Management policies
- Security Management policies
- Automate cost control measures and delegate to teams.

✅ Improve

- Leverage upfront commitments such as reserved instances.
- Delete Zombie Infrastructure
- Right Size your environment
- Stop and Start Test and Dev servers on a schedule.

What's included?

You will receive a Cloud Optimisation Assessment report that will highlight:

- ✅ Your current and future state based on our analysis including cost saving options aligned to your business needs.
- ✅ Recommendations to efficiently manage your cloud environment.
- ✅ A roadmap to save cost, and insights to maintain an efficient cloud ecosystem.

Leveraging our expertise.

We help organisation optimise their cloud environment. Our unique customer engagement model and award-winning local team combined with our leading managed services, provides you with the peace of mind you need to innovate and digitally transform your business.

Our end-to-end consultancy and support make it easier to migrate, secure, protect, monitor, manage, support, and govern business critical data and applications. We give you the flexibility to adapt the cloud to your business requirements and guide you through the entire process at a pace that works for you.

Speak to us today to book your cloud optimisation assessment.
