

NEXON'S DIGITAL WORKSPACE

Secure access to applications and data from any device with a single workspace.

Today's workplace is changing. Organisations are navigating technology disruption and new expectations from both staff and customers are driving new ways of working. With a multigenerational workforce that includes tech-savvy Millennials, the need to cater for remote workers, along with the increase in volumes of data, and the ease of access to work files outside of the physical workplace are all driving the need to adapt to this new world of work.

Organisations are left with balancing security and employee demands, across multiple devices. Nexon's Digital Workspace enables this vision, delivering secure access to applications and data from any location and any device through a single interface.

BALANCING MOBILITY, AGILITY AND SECURITY

Delivering the mobility and flexibility the business needs and expects is about enabling your team to be productive from any location or device while controlling who has access to company data, when and how.

By providing employees with a single point of access to everyday applications, no matter the device or cloud, organisations can

simplify IT and also remove some of the associated risks such as the use of personal devices and B2C applications, unsanctioned file sharing and collaboration tools to do their work.

Nexon's Digital Workspace supports several important business outcomes, including:

Improved workplace flexibility. Users have everything they need to be productive from any location, with a single portal to access all tools, including cloud and legacy applications.

Better user experience. Give users all the tools and applications needed to do their job via a single sign on, available through a consistent interface across all devices.

Enhanced security. Retain control of who has access to business data, when and with what applications. Access can be granted and revoked with ease with Nexon's digital workspace.

Better cost control. Delivered as a managed service, the platform is available through a flexible per user, per month model, enabling organisations to scale up and down in line with business needs.

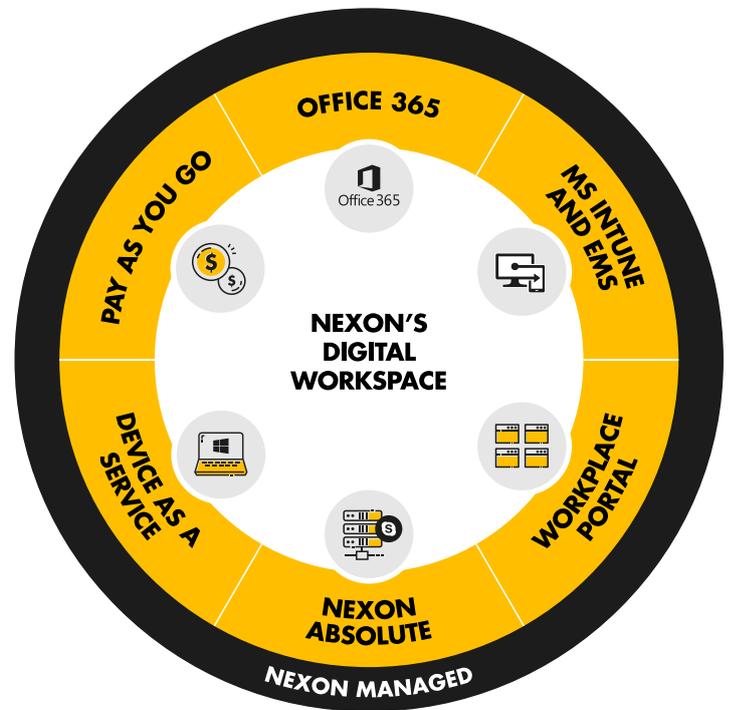

Simplified platform management. All end user devices are managed through the portal, reducing the I.T burden or provisioning new devices and managing existing users.

NEXON'S DIGITAL WORKSPACE

Nexon delivers the Digital Workspace by leveraging Microsoft Office 365, integrating identity, application, and enterprise mobility management bundled with managed services to offer a better user experience, security, and control via a single interface.

Nexon helps organisations implement these tools and applications in a consistent and secure way – and offers the mobility, flexibility and control today's organisations are looking for.

NEXON'S DIGITAL WORKSPACE ENCOMPASSES:

- 
MICROSOFT OFFICE 365
 Provides users with flexibility and security to access every day cloud-based application tools, such as email and collaboration tools.
- 
A SINGLE SIGN-ON PORTAL
 The workspace portal is visible from any device, which serves as an entry point to the company's business applications, including legacy applications.
- 
CLOUD-BASED DESKTOP AND MOBILE DEVICE MANAGEMENT
 Incorporating MS Intune, a tool that helps organisations provide access to company applications, data, and resources from the device of an employee's choice.
- 
HOSTED SKYPE FOR BUSINESS
 Nexon Absolute is a flexible and powerful unified communication solution centrally managed and delivered by Nexon to enable a seamless cloud telephony and contact centre environment.

- 
FLEXIBLE PAYMENT OPTIONS
 All services and devices are bundled into a flexible, per user, per month 'Pay as you Go' payment plan.
- 
BUNDLED DEVICES
 Select the type of devices and have them supported under the managed service.
- 
ONGOING SUPPORT
 The environment is completely managed by the Nexon team, including device and end-user support.

Mobile workers are expected to account for 42.5% of the global workforce by 2022.

'Global Mobile Workforce Update 2016-2022' – Strategy Analytics Report

How is your organisation delivering on the flexibility promise while retaining control of your company data?

WHY NEXON?

Nexon works hard to help organisations realise a modern workplace vision and establish a Digital Workspace environment. Our depth of expertise spans across a range of technology specialities, and industries, both as a managed service provider and trusted partner. Nexon brings these skills together to create business solutions, simplifying the process – and the technology.
